Published on the Scale of Four Miles to One Inch.

MS. COPIES OF SIX-INCH GEOLOGICAL MAPS.

When an area is geologically surveyed on the scale of six inches to the mile, MS. copies of the maps are prepared and deposited in the Survey Offices of the respective countries, for public reference. Copies of these maps can be supplied at the cost of drawing and colouring the same. Applications should be made to the Director, Geological Survey Office, Jernyn Street, London, S.W.1; or 33, George Square, Edinburgh.

When the maps relate to mining areas they are usually published. Particulars as to published six-inch maps will be found on pp. 49-66, 99-108.

ONE-INCH MAPS. OLD SERIES.

Scale 1-mile = 1-inch. 1: 63360.

In Sheets and Quarter Sheets; some published without Glacial Drift are known as the *Solid Geology Maps*, others published with the Drift are known as the *Drift Maps*.

In the Northern Counties, the quarter-sheets of Nos. 91 to 110 Old Series, are the same as Nos. 1 to 73 New Series. The Geological Survey Maps of this area, therefore, now carry two numbers, referring to the Old and New Series respectively.
